

Reservationless-Plus Mobile App Now Available!

Meet On the Go from Your iPhone with SmartMeet

SmartMeet™ lets you stay connected anywhere without blowing your minutes plan! SmartMeet, our FREE Reservationless-Plus® mobile application for iPhone, is a revolutionary smartphone app for people on-the-go.

Users will find that SmartMeet is packed with powerful features, including:

- **Meeting Control:** Maintain total meeting control with in-app features—mute, unmute, rename, disconnect all or individual participants and much more.
- **Voice over IP:** Use Voice over IP to talk and control your meetings on carriers that don't support simultaneous talk and data or when traveling internationally to avoid high roaming costs.
- **Dial-In & Support Numbers:** Easily retrieve and connect to your designated local and international dial-in and support numbers with one tap.
- **One-Touch Access:** Start or join your audio meeting with a tap of the screen. Trigger our Call Me feature to initiate a call to one of your stored phone numbers or dial right into your meeting with no hassle.
- **Push Notifications:** Receive push notifications when someone first enters your waiting room and again after five minutes of inactivity as a reminder to start your meeting.
- **Native Calendar Integration:** See when you have a free moment and the ability to schedule a meeting by using the in-app calendar using your device's native calendar.
- **Participant & Waiting Room View:** View participants in your meeting or waiting for your approval to join your meeting by easily navigating between the Participant and Waiting Room view tabs.
- **Chat:** Add a new level of engagement between yourself, participants and their peers with the in-meeting chat feature.
- **Multiple Accounts:** Save multiple accounts for hosting your conference calls.
